

Introducing Atom's Off-the-Ground™ Cable Management

Designed with a heavy-duty spring-motor technique that has unmatched industry performance with streamlined aesthetics.

Off-the-Ground Technology

Eliminates tripping hazards by keeping 18ft cables and plugs off the ground

Integrated Design

Easier inspection and maintenance with the cable management assembly attached to an easy-to-access panel.

Easy Operation

Increase comfort and ease of use with 70% lighter constant pull-force (compared to competition).

Increased Safety

Eliminate cable and plug fly-backs with controlled retraction.

The Industry's Only EV Charging Powered by the World's First Solid-State Circuit Breaker

Say Hello to Digital

Powered by a software-defined, highly secure, and fastest digital circuit breaker in the world.

The Future is Scalable

Full range of programmable level 2 charging from 1.4 kW to 19.2 kW, future-proofing your solution.

Fundamental Efficiencies

Dynamic energy management balances the full building load, putting control back in your hands.

The New Standard

Built-in real-time diagnostics, reporting, and EV charging asset management ensure the highest performance and reliability.

Secure Solution

FedRAMP-level cloud security standards.
