## **FOR IMMEDIATE RELEASE**

### **CAROLINA CAT POWER SYSTEMS AND ATOM POWER ANNOUNCE PARTNERSHIP**

*Creating Increased Accessibility for Customer Energy Solutions*

**CHARLOTTE, N.C., June 2023** – Carolina Cat Power Systems and Atom Power, Inc. are pleased to announce a business partnership that will make energy solutions more accessible to their customers and partners.

The partnership marks two leading North Carolina-based companies working together to build a more energy-efficient future.

“Our new partnership with Atom Power aligns with Carolina Cat’s reputation of reliability, innovation, and service in electric power” said Tom Aloor, Vice President, and General Manager of Carolina Cat Power Systems. “It will also allow us to further help customers in their energy journey.”

Carolina Cat Power Systems will now provide Atom Power’s EV charging solutions with real-time visibility and management capabilities. Similarly, Atom Power will now offer Carolina Cat generators and transfer switches in applications and offerings to help meet customer needs.

“The Atom Power solution for EV charging is truly advanced; with an emphasis on a system-wide solution that eliminates integration, maintenance, and power-management challenges. This fits into our ‘Built to Last’ approach” said Aloor. “As a trailblazing company, we are excited for this partnership and will always find ways to solve our customers’ power systems needs as they evolve.”

“We’ve built a new way for businesses to deploy EV charging solutions with maximum reliability, visibility, protection, and control,” said Ryan Kennedy, co-founder and CEO of Atom Power. “By partnering with Carolina Cat Power Systems, a well-respected brand in this industry, we’re able to complement our industry-leading technology with their innovation in energy solutions.”

#### **About Carolina Cat Power Systems**

Carolina Cat Power Systems, a division of CTE (Carolina Tractor & Equipment Company), serves as the Caterpillar® dealer for Western North Carolina, and has been serving the region for over 96 years. Carolina Cat Power Systems has a strong reputation of supporting customers’ needs for electrical power, systems solutions, and services including electrical testing in healthcare, datacenters, industrial, and commercial applications.
